

We provide a perfect exterior for any building!

Flexible clinker is made of environmentally friendly, vapor-permeable and fire-safe material with unique properties, which provide for its multipurpose use.

Our **flexible clinker** provides for perfect exterior and interior finishing thanks to its advantages:

- **Appearance:** flexible clinker is visually indistinguishable from natural ceramic bricks.
- **Minimizing costs and complexity:** using flexible clinker makes finishing much easier and cheaper.
- **Ease of use:** you can install clinker yourself!

We produce and supply modern finishing material mimicking clinker and brick.

We also offer:

 a wide range of colors

 polymer adhesive grout

Areas of application:

Flexible clinker can be bent at any angle or cut, making it great for working with non-standard shapes. We offer a wide range of colors and many surface textures, so you can easily find the right material for your interior and exterior.

Flexible clinker boasts certain features that make it a perfect solution for facade finishing:

1 environmentally friendly
– made from high-quality
eco-material

2 resistant to seasonal
temperature changes

3 has a wide range
of colors

4 flexible clinker
is vapor-permeable

5 flexible and easy
to install – no special
skills required

6 lightweight –
the material doesn't
load the facade

Flexible clinker combined with polymer adhesive (grout) will help you finish a facade quickly and inexpensively.

The advantages include:

- The weight of flexible clinker – 3.5 kg/m²
- Thickness – 2.5-3 mm
- The consumption of adhesive – 2.3-2.5 kg/m²
- Frost resistance – not less than 200 cycles
- UV resistance – 8 points

8 reasons to work with us:

1. High quality of raw materials.
2. A wide range of products
3. Reliable and timely deliveries.
4. Five-year experience.
5. Favorable prices.
6. Short production terms.
7. High production capacities.
8. Individual approach.

Customers trust us!
